

OUR PUBLIC HEALTH FACULTY

Faculty from the Department of Health and Human Performance guide students interested in the environmental aspects of public health. Their knowledge and specializations are vital to the education of our students and help prepare them for a career in the field of environmental health.

DR. PAUL SANDIFER

Dr. Sandifer serves as the Director for the Center for Coastal Environment and Human Health at the College of Charleston. An active advisor to our students, he specializes in connections between ocean health and human health, coastal ecology, and aquaculture.

DR. LESLIE HART

Dr. Hart serves as a current advisor to our students. An alum of our program, her research interests focus on environmental exposure to manmade chemicals and resultant health effects.

DR. BRIAN BOSSAK

Dr. Bossak has previously served as an advisor to our students. His research interests range from climate change and health to spatial epidemiology, water quality, and public health preparedness. He also works frequently with GIS and remote sensing.
